

## Kit Blank Underground Automation – How Can I Tell Which Version I Have?

When seeking replacement motors / spare parts for the Shark underground system, two versions were produced referred to as Old Style and New Style. BOTH are NOT backward compatible so it is important to make sure that the right style is identified. Below is a quick way a customer can tell which one they have:

**New Style = From 2008 to Present Day**  
**Old Style = Prior to 2008**
